

CAP^D Pro **AP 70/85 R**

Meet **CAP Pro AP 70/85 R**

Part of Petrobras' CAP Pro line of more sustainable asphalt products, aligned with the transition to a low-carbon future — **CAP Pro AP 70/85 R** is a high-penetration Petroleum Asphalt Cement (in the 70/85 range). It is ideal for **RAP (Reclaimed Asphalt Pavement)** recycling operations, offering rejuvenating properties for the hot recycling of damaged asphalt surfaces, thereby incorporating circular economy principles and enabling reduced paving costs. **Now with renewable content:** Formulated with at least 1% vegetable oil.

CAP Pro AP 70/85 R is characterized by its versatility, being usable in RAP recycling, and serving as feedstock for **Polymer-Modified Asphalts (PMAs), Rubberized Asphalts, Asphalt Emulsions**, waterproofing products, and other industrial asphalt applications.

What are the main benefits of CAP Pro AP 70/85?

**RAP recycling
in paving**

**Rejuvenating
capacity** for recycled
material

Higher RAP content,
reducing the need for
virgin material

**Feedstock
for industrial
processing**

Composition
rich in **maltene
compounds**

Reduction in waste generation during resurfacing

Savings of approximately 20% in aggregates and 25% in binder

Eliminates the need for rejuvenating agents

Good durability, comparable to standard asphalt cement

Facilitates the **industrial** processing workflow

Suitable for the production of **Modified Asphalts**

Contains renewable content in its formulation.
